

Wind Energy Law

Investing in Canadian Wind Energy

Wind energy is the fastest growing renewable energy source in Canada and around the world. It represents a clean and sustainable source of energy, in abundant supply. Global companies, new capital funds, large and small power purchasers and consumers have all been drawn to wind in recent years. In response, governments across Canada have begun to show support and the industry is growing rapidly.

By 2012, according to estimates, Canada is expected to reach a total installed wind energy capacity of over 5600 (MW), representing a total expected investment of over \$8.4 billion.

At Dale & Lessmann LLP, we have the experience to help.

Tracing its origins back over ninety years, Dale & Lessmann LLP has one of Canada's leading law practices devoted to advising industry leaders in the wind and renewables sectors. Our firm's commitment to excellence, timeliness and outstanding client service has stood it well over the years so that Dale & Lessmann LLP lawyers are now recognized leaders in Canadian and international business circles.

We are proud to have acted on behalf of developers, lenders, suppliers, equipment manufacturers and equity investors from across Canada, the United States and the European Union in recent years and we look forward to continuing to serve the wind industry for decades to come. As a full service business law firm, we also have the legal expertise to assist our clients in corporate law, securities, employment, real estate, contract law, equipment leasing, project finance, immigration and intellectual property law.
