

## Tax Law

Dale & Lessmann LLP offers significant experience in all aspects of tax law, including inbound international structuring and planning, estates and trusts, corporate financings, commodity taxation, customs, renewable energy, reorganizations and restructurings, transfer pricing, compliance settlements, appeals, and employee benefits.

### Corporate Tax Planning

Much of our work involves structuring business arrangements to minimize tax exposure. We devise tax strategies that help many of our clients reduce their tax exposures in order to achieve their business objectives.

### Tax Disputes

We advise clients at all stages of the tax dispute process, from the audit phase through administrative appeal to court challenge. In most cases, resolutions are negotiated out of court. Failing settlement, we vigorously defend and advance our clients' interests through all court levels.

### Sales and commodity tax

Our practice assists clients with all aspects of sales and commodity tax, including land transfer tax (HST/GST/PST/LTT). We help clients plan highly tax-efficient transactions, minimize the sales tax incurred in acquiring assets or property, deal with sales tax discrepancies between different jurisdictions and fight tax liabilities.

### Trusts and Estate Planning

We provide advice on both estate and wealth management, working with our estate specialists to ensure a tax efficient estate plan. We assist in all aspects of establishing charitable organizations and foundations, and ensure ongoing compliance with applicable regulations.

We offer the specialized client-centered service of a sophisticated tax law practice incorporated within a leading business law firm
