

Corporate Commercial Law

From Idea to Execution. You need good advice.

Our corporate lawyers provide timely expert advice on business transactions of all sizes and complexities - frequently with a cross-border perspective.

We provide advice on business organization, capital structure, finance, growth, tax mitigation, liquidity and exit strategies. We also provide our corporate clients with practical legal solutions in the areas of employment law, joint ventures, partnership agreements, shareholder agreements, buy-outs, strategic alliances, licensing, marketing, web domain management and distribution arrangements.

Generating Capital

We represent a number of leading Canadian and European lending institutions and we understand the competitive business environment in which they operate. As a result, we regularly guide Canadian and European companies which are seeking financing from traditional banks, government-sponsored and government-supported lending sources, and from alternative sources, including corporate and individual investors, joint venturers, venture capitalists and off-balance sheet financiers.

Mergers and Acquisitions

Whether you are buying out a former competitor, expanding into a new marketplace or selling off a division, our corporate lawyers can help guide you through the necessary steps and protect your interests along the way.

European Business

We represent many European-based companies, ranging from small privately-held companies to multinational public companies in their business dealings in Canada. Our experience in this area includes servicing a wide array of industries, including industrial manufacturing, food product manufacturers, consumer product manufacturers, distributors, financial institutions, automotive parts manufacturers and engineering firms.
